

BRAND Hunter Fan

DESCRIPTION

Introducing the 96 Inch Industrial Ceiling Fan. It is designed to significantly improve air circulation in large spaces like vaulted living rooms, pole barns, and industrial buildings. The large blades do the work - it turns at lower speeds than a standard ceiling fan yet moves much more air (CFM) because of its long 96 inch aluminum blade span. With this fan, you get the air circulation you need to regulate room temperature and keep heating costs down without the wind and breeze created by smaller fans. Can also be installed as a three blade fan. Damp rated for use in covered porches, patios, and sunrooms and uses Dust Armor nanotechnology blade coating to repel dust buildup. Satin metal finish. Features six blades, three speeds, and wall control. Supplied with 12 inch downrod. Replacing SKU 28743. Dimensions: 96 inch width x 24.6 inch height.
