

BRAND Aero Pure

DESCRIPTION

The A515 Exhaust Fan with Heater and Light combines a low-noise bathroom ventilation fan with a powerful, efficient heater and a light, providing immediate warmth when you step out of the shower while quietly clearing excess moisture. Two extra-wide anti-blast infrared heat lamps keep the bathroom warmer with fewer cold spots. The fan, heater and light can be wired separately, and a 3-function wall switch is included. The two heat lamp bulbs and a 60W type A incandescent light bulb are also included. This IC-rated fixture is suitable for new construction or remodel applications and fits with 2 x 8 inch joists. Articulating expandable anti-vibration brackets and a connector for 4 inch ducts are included. The fixture has rust-proof steel motor housing, a built-in backdraft damper and thermal shutoff. It cannot be installed directly over a tub or shower enclosure. UL listed when used with GFCI branch circuit wiring.
