DESCRIPTION

600 watt remote magnetic transformer converts 277 volt input to low voltage 24 volt output for powering Monorail system. To prevent voltage drop it is best to keep the transformer within 20 feet of the power canopy/junction box. 24 volt lamp must be used. A 1000 watt magnetic low-voltage dimmer must be used when dimming is desired, sold separately. The dimmer is powered on the line voltage side of the transformer. Some buzzing may occur on low levels and may be reduced with a dimming de-buzzing coil (TDB-600), sold separately. 6W x 4.75H x 9.5L.
