

# Installation Instruction for Crystal Galaxy

## IMPORTANT INFORMATION

- Please read this installation instructions before start installation.
- Risk of Injury: Make sure that the power to the electrical box is off before starting the installation, or changing the light bulb.
- The fixture is rated for indoor dry locations only.
- Have a qualified electrician to install this fixture.

**SAVE THESE INSTRUCTIONS!**

## Install the Fixture

- 1:** Determine the overall fixture height by adjusting the aircraft cable going into the canopy. Push the tab on the cord grip to release the aircraft cable.

**CAUTION:** To reduce risk of a burn or electrical shock during lamping, disconnect the power to the fixture.

Use **MAX 2 Watt**, Type E10 Miniature Lamp, for each Socket, or **0.3 Watt LED E10**.

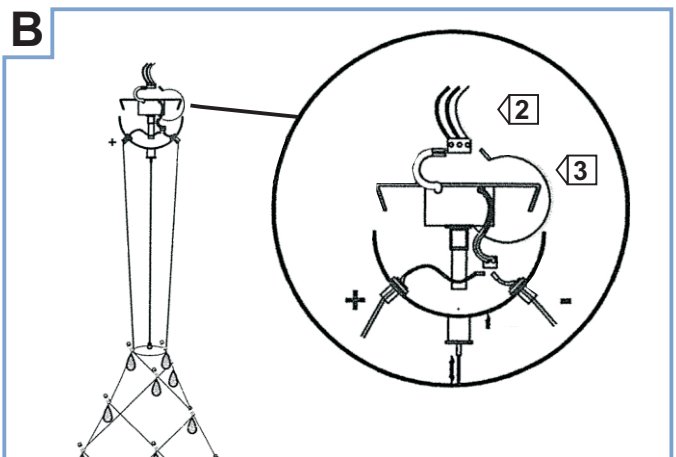

**NOTE:** Use a soft cloth and fingers to install the lamp.

- 8:** Screw each lamp into the socket.

- 9:** Hang each crystal onto the peg in front of the lamp.

**ATTENTION:** When replacing lamp, make sure power to the fixture is turned off. Remove the crystals near socket and replace the lamp with a new one.

- 2:** Connect the transformer black and white wires to the power line hot and neutral wires respectively with wire nuts.
- 3:** Connect the ground wires based on local electrical codes.
- 4:** Place the wires and wire nut connections inside the electrical box and mount the back plate to the electrical box with the two #8-32 screws.
- 5:** Feed the "+" and "-" fixture wires through the canopy inlets. Cut the excess wires, leaving 6 inches for power connections.
- 6:** Connect these wires properly to the transformer 12 volt wires with wire nuts.
- 7:** Slide the canopy up over the back plate. Align the mounting hole and secure it in place by tightening the screw.
